## **BUILDING A SCALEABLE NATIONAL REPOSITORY INFRASTRUCTURE FOR CANADA**

Todd Trann, University of Saskatchewan  
Alex Garnett, Simon Fraser University

CANHEIT June, 2016

# What Is A Data Repository?

Main functions: **digital storage, retrieval and preservation** of research data

**Institutional Repositories** are run by colleges and universities

- cIRcle (Run by UBC)

**Regional Repositories** are run by groups of universities

- Scholars Portal (Run by OCUL)

**Domain Specific Repositories** are run by organizations or communities of researchers

- BioGRID (Biology; run by the BioGRID team)

There are thousands of research repositories in the world (see: [re3data.org](http://re3data.org))

# YARR

- Current repositories don't scale to very large data sets
- Hard to discover data sets in existing repositories
- Some researchers don't have access to a suitable repository

# Project Overview

Designing infrastructure for a national research data repository

- Partnerships between Compute Canada, Globus and CARL (Canadian Association of Research Libraries)
- Using Compute Canada hardware

Designing discovery platform

- Indexing metadata of existing repositories
- Sharing back a search API
- Improving cross-repository discovery
- Facilitating domain specific search development

# Planned Features

- **Federated Storage Model:** Storage and repositories can be distributed, owned and operated by organizations / institutions
- **Scalable:** Many files; large files; large total amounts of storage
- **National Data Discovery:** Single search to discover data, regardless of location

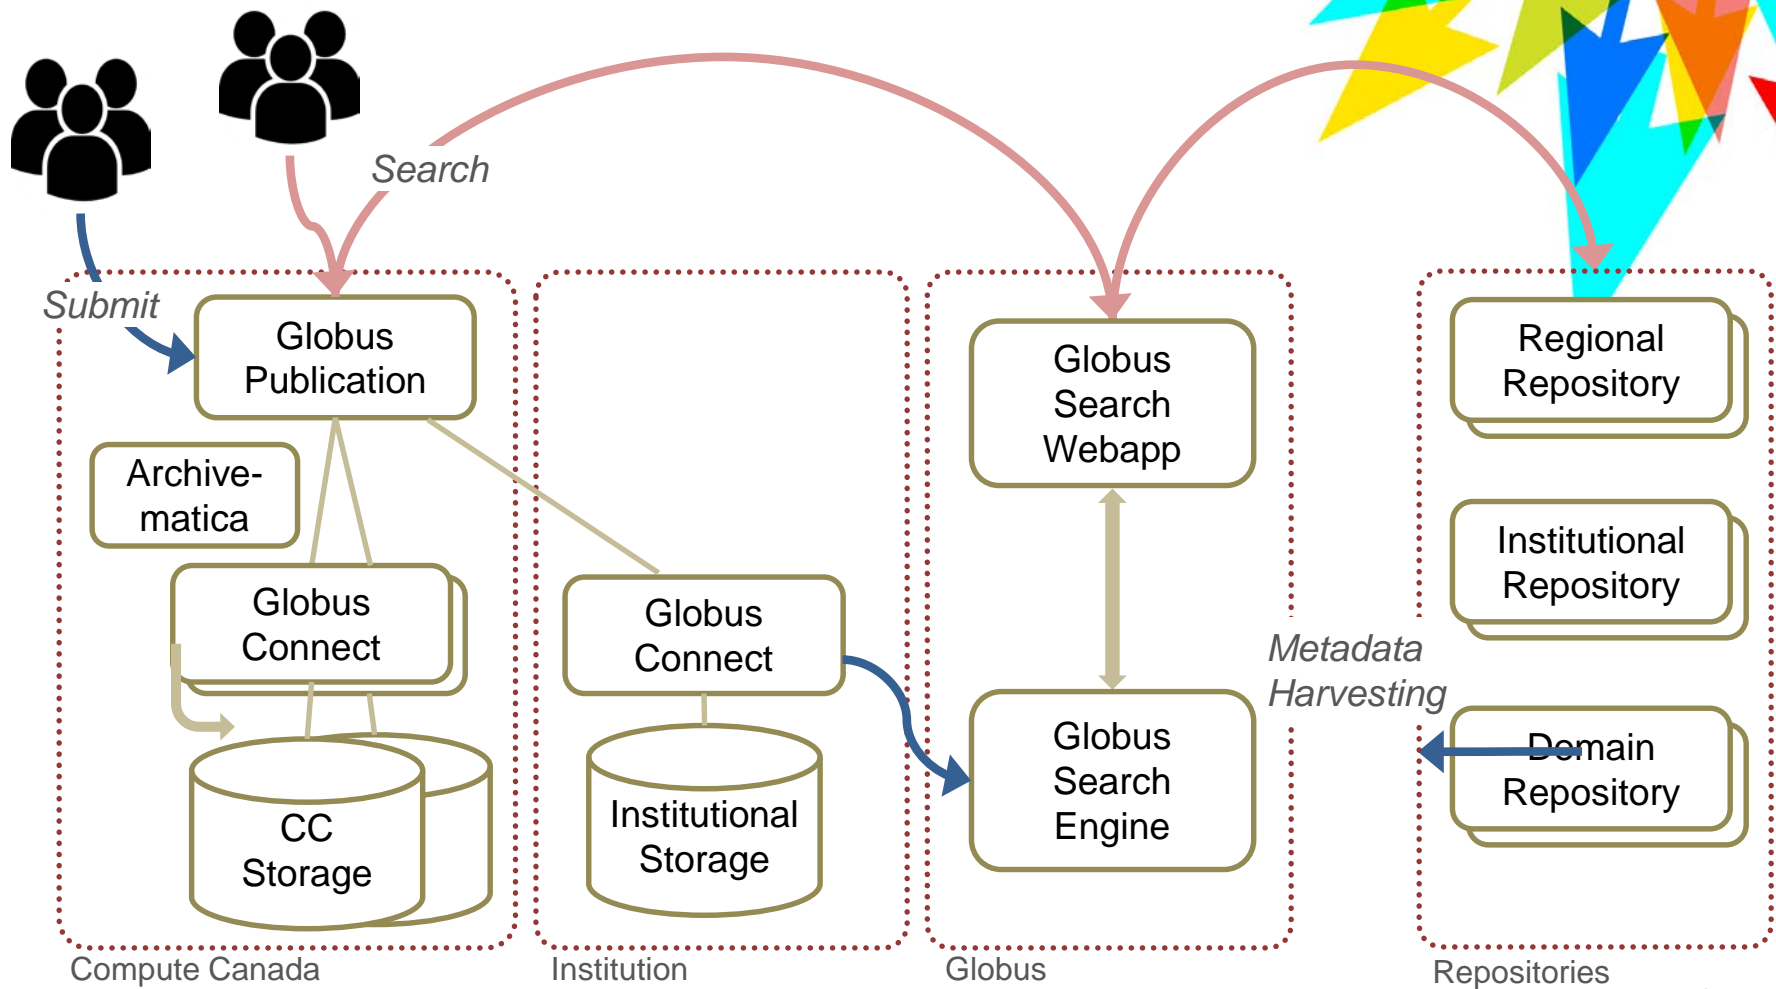

# Planned Features (cont'd)

- **Data Preservation:** Use Archivematica to automatically preserve data
- **Suitable for broad range of data types**
- **Automatic geographic data replication:** We intend to leverage Compute Canada national data infrastructure being deployed in 2016

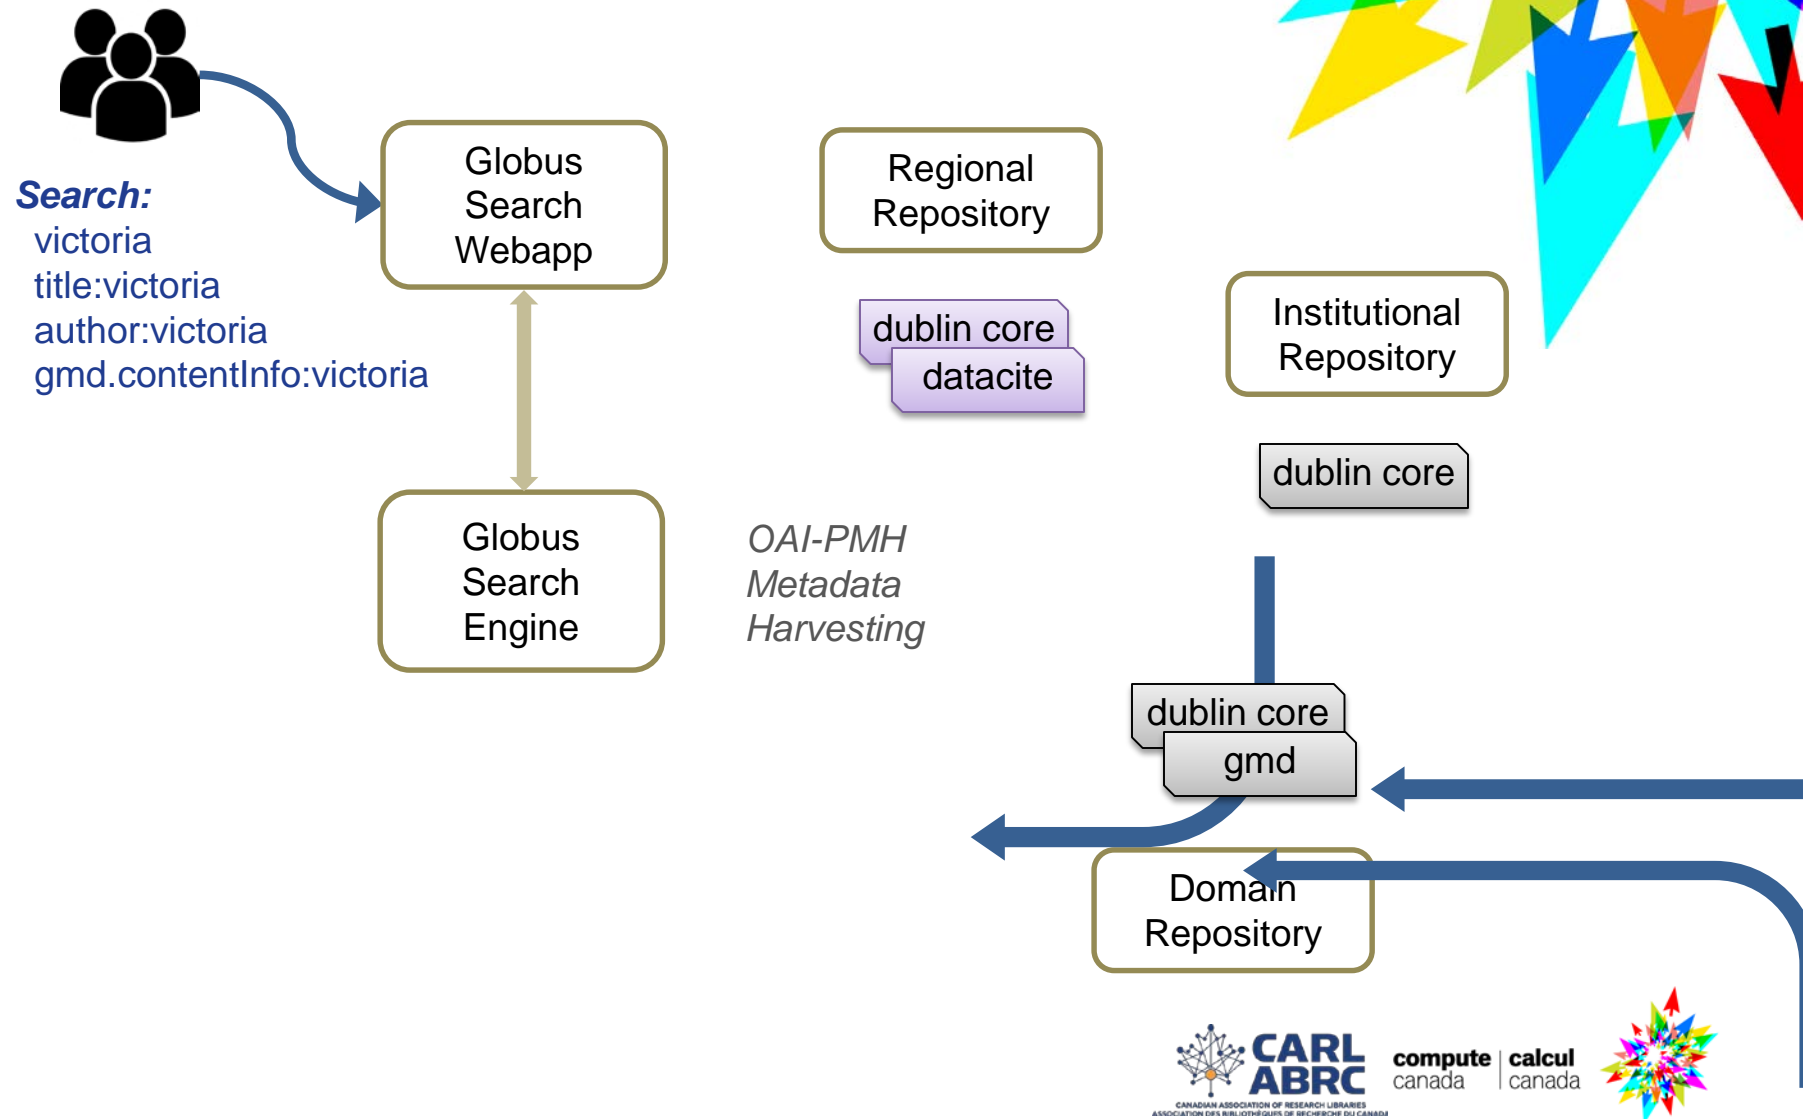

# System Diagram

# Metadata Overlay

# Preservation Automation

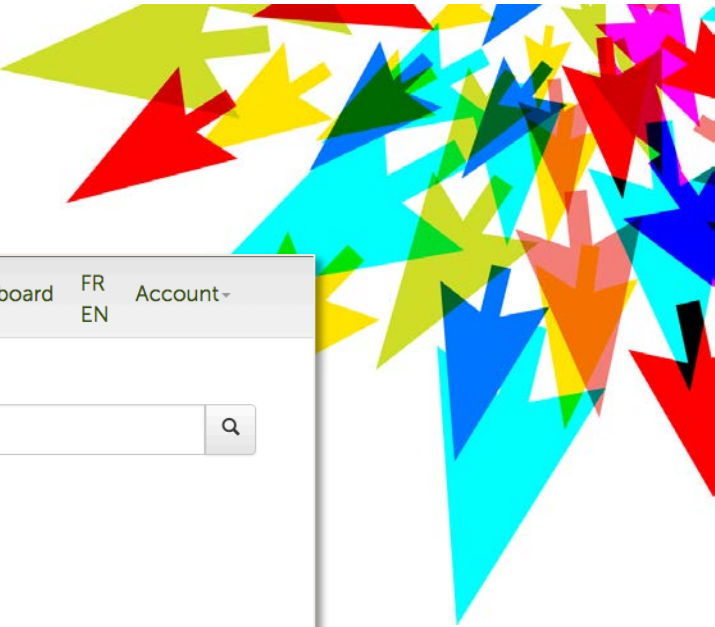

# Discovery Landscape

- A University of British Columbia/CARL-Portage group (led by Eugene Barsky) is doing an environmental scan of data discovery systems, and considering options for the design of a coordinated, national discovery service for research data in Canada
- The white paper from this scan will inform finalization of the discovery interface

## Submit: Describe Dataset

All fields with an asterisk (\*) are required

The title or name by which the dataset is known.

**Title \***

The authors or researchers who produced the dataset.

**Authors \***

<input type="text" value="Doe"/>	<input type="text" value="John"/>
<small>Last name, e.g. Smith</small>	<small>First name(s) + "Jr", e.g. Donald Jr</small>

[+ Add More](#)

The year (or full date) when the dataset was or will be publicly available.

**Publication Date \***

Month:	<input type="text" value="June"/>	Day:	<input type="text" value="12"/>
Year:	<input type="text" value="2016"/>		

The name of the entity that holds, archives, publishes prints, distributes, releases, issues, or produces the dataset.

## Your Submissions

Below are listed your previous submissions that have been accepted into the archive.

There are **8** datasets in the main archive that were submitted by you.

Issue Date	Title	Author(s)
8-Jul-2014	ArcticNet 1305 - Northwest Passage CTD data	Gratton, Yves
25-Sep-2014	Acoustic data in the Beaufort Sea: BREA marine fishes 2012-2014	Fortier, Louis; Geoffroy, Maxime; Majewski, Andrew
17-Feb-2015	Effect of movement between <i>Salix arctica</i> individuals on <i>Gynaephora groenlandica</i> caterpillar growth rates at Alexandra Fiord, Nunavut, Canada, 2013	Henry, Gregory; Greyson-Gaito, Christopher; Barbour, Barbour
15-Dec-2015	Gastropod surveys in south-eastern Victoria Island	Sullivan, Josh; McLennan, Donald; Kutz, Susan; Tomaselli, Matilde
16-Jul-2015	Transects for pellet counts in tundra ecosystems around Cambridge Bay, Victoria Island	McLennan, Donald; Anablak, Cathy
16-Dec-2015	Bathymetry of a section of east end of Cambridge Bay, near the future site of the sea water intake for CHARS, Cambridge Bay, Nunavut	McLennan, Donald
8-Jul-2015	Identification and characterisation of subsurface flows in the Apex River, Iqaluit, Nunavut	Franssen, Jan; Chiasson-Poirier, Gabriel; Lamoureux, Scott
15-Dec-2015	Preliminary freshwater sampling of selected streams in the watershed of Greiner Lake, Cambridge Bay, Nunavut.	McLennan, Donald

# Starting A Search

The screenshot shows the ENDR NRDR website. At the top, there is a navigation bar with the logo 'ENDR NRDR' on the left, a green button labeled 'Browse & Discover' in the center, and links for 'Data Publication Dashboard', 'FR EN', and 'Account' on the right. Below the navigation bar is a search bar containing the text 'research'. A grey arrow points to the search bar. Below the search bar, there is a welcome message: 'Welcome to the National Research Data Repository. Bienvenue a l'entrepôt national de données de recherches.' Below the welcome message, there are three main sections: 'Communities', 'Discover', and 'Issue Date'. The 'Communities' section has a heading 'Choose a community to browse its collections.' and a list of communities, with 'Canadian Polar Data' highlighted. The 'Discover' section has three sub-sections: 'Author', 'Subject', and 'Issue Date'. Each sub-section has a list of items with a count in a circle next to them.

# Dataset File Transfer

The screenshot displays the Globus Transfer web interface. At the top, there are navigation links: "Manage Data", "Groups", and "Account". The main header features the "compute canada" and "calcul canada" logos. Below the header, a navigation bar includes "Transfer Files", "Activity", "Endpoints", "Bookmarks", "Publish", and "Console". The "Transfer Files" section is active, showing two endpoints for comparison. The left endpoint is "/export/globusdata on rdmtst1" with a path of "/published/publication\_36/submitted\_data". The right endpoint is "computecanada#silo" with a path of "/~". Both endpoints show a list of files and folders. The left endpoint lists several CSV and XLSX files, including "CCIN11942\_20150423\_Gastropod\_Survey\_2013.xlsx" (75.06 KB) and "CCIN11942\_20150423\_Gastropod\_Survey\_2013\_Freshwater\_Sampling\_2013.csv" (1.84 KB). The right endpoint shows a folder named "data". At the bottom, there is a "Label This Transfer" field and a "Transfer Settings" section with a checkbox for "sync - only transfer new or changed files".

Globus Transfer
